GROUP 11

Supervisors: Ph. D Truong Vinh Lan

o0o

Students: Tran Dang Khoa - 2252363
Phan Tran Quoc Tuan - 2353273
Tran Gia Lam - 2352670
Nguyen Tan Hung - 2352439
Nguyen Huu Cau - 2352129

HO CHI MINH CITY, MARCH 08 2026

1 Project Information

- **Topic:** Assignment 1 - Machine Learning with Tabular Data
- **Project's name:** Home's Value Prediction

2 Completed Work

During the past week, our team has completed the following initial tasks:

- **Dataset Selection:** We have selected a tabular dataset for our project, which focuses on predicting house prices.
- **Data Storage and Description:**
  - The dataset file has been uploaded and can be accessed via our Google Drive: [Home's Dataset]
  - The detailed description and context of the dataset can be found on Kaggle: [Dataset's Description]
- **Task distribution and team meeting:** We organized a team meeting on the evening of Wednesday, March 4th, to discuss the project workflow and distribute tasks among all team members.

3 Task Assignment

The detailed task assignment and project timeline have been documented and can be tracked through our project document:

- **Work Plan & Assignment:** [Task Assignment]

4 Meeting Evidence

Please find attached the screenshot of our team meeting on March 4th below:

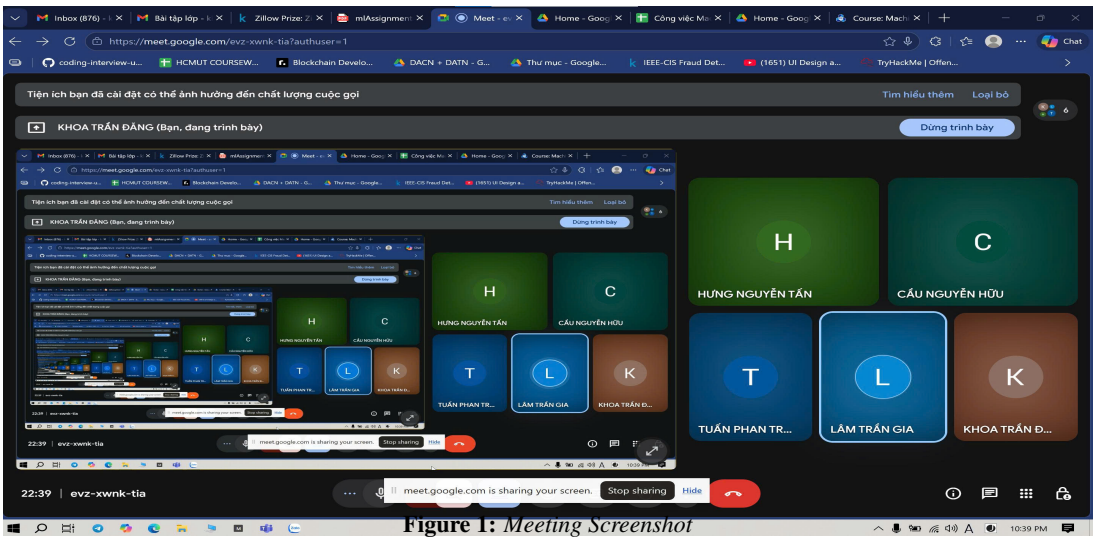

Figure 1: *Meeting Screenshot*

5 Next Steps

- Perform Exploratory Data Analysis (EDA) on the selected dataset.
- Preprocess the data (handle missing values, feature engineering, etc.).
- Research and implement baseline machine learning models for our dataset.
